Prof. O. C. Zienkiewicz
Swansea, U.K.

Publishing, Subscription, and Advertising Offices: Pergamon Press Inc., 395 Saw Mill River Road, Elmsford, NY 10523, U.S.A., or Pergamon Press plc, Headington Hill Hall, Oxford OX3 0BW, U.K.

Published two issues/month (four volumes 1992)

Annual subscription rates (1992)
Annual Institutional Subscription Rate (1992): £1255.00 (US$2280.00). Two-year Institutional Rate (1992/93): £2384.50 (US$4332.00). Sterling prices are definitive. US dollar prices are quoted for convenience only, and are subject to exchange rate fluctuation. Prices include postage and insurance and are subject to change without notice. Subscription rates for Japan include despatch by air and prices are available on request. Personal subscription rate for those whose library subscribes at the regular rate is available from any Pergamon Press office.

Application to mail at second class postage rate is pending at Rahway, NJ. Postmaster send address corrections to Computers & Structures, c/o Pergamon Press Inc., 395 Saw Mill River Road, Elmsford, NY 10523, U.S.A.

Whilst every effort is made by the publishers and editorial board to see that no inaccurate or misleading data, opinion or statement appears in this journal, they wish to make it clear that the data and opinions appearing in the articles and advertisements herein are the sole responsibility of the contributor or advertiser concerned. Accordingly, the publishers, the editorial board and editors and their respective employees, officers and agents accept no responsibility or liability whatsoever for the consequences of any such inaccurate or misleading data, opinion or statement.

Cover design by Mr J. Koukos

LIST OF CONTENTS

NUMBER 1

M. S. Gadala	1	Alternative methods for the solution of hyperelastic problems with incompressibility
K. K. Yalamanchili, S. C. Anand and **D. D. Warner**	11	Three-dimensional finite element analysis on a hypercube computer
C. P. Pantelides	21	Stability of columns on biparametric foundations
A. Cifuentes and **S. Lalapet**	31	A general method to determine the dynamic response of a plate to a moving mass
S. S. Rao, K. Sundararaju, B. G. Prakash and **C. Balakrishna**	37	Multiobjective fuzzy optimization techniques for engineering design
M.-L. Liao, H.-S. Jing and **M. Hwang**	45	Improvements on the higher order plate element with partial hybrid stress model
A. H. Sheikh and **M. Mukhopadhyay**	53	Analysis of stiffened plate with arbitrary planform by the general spline finite strip method
Chun-Ying Lee and **Dahsin Liu**	69	An interlaminar stress continuity theory for laminated composite analysis
Y. Ibrahim	79	Comparison between failure sequence and failure path for brittle systems
I. Sheinman, Y. Frostig and **A. Segal**	87	PBCOMP program for buckling and postbuckling of stiffened laminated curved panels
J. C. Simo and **T. A. Laursen**	97	An augmented Lagrangian treatment of contact problems involving friction
Jeng-Shian Chang, Jiunn-Hsiung Wang and **Tseng-Zong Tsai**	117	Thermally induced vibration of thin laminated plates by finite element method
	I	Software Survey Section

NUMBER 2

Y. Chen and **T. Krauthammer**	129	Seismic effects on large reinforced concrete lifelines—I. Theory
Y. Chen and **T. Krauthammer**	137	Seismic effects on large reinforced concrete lifelines—II. Implementation

Z. Behin and **D. W. Murray**	145	A substructure–frontal technique for cantilever erection analysis of cable-stayed bridges
Kyu J. Lee	159	Buckling analysis of orthotropic plates using a finite element method of assumed displacement functions
F. Fujii, B. C. Perez and **K. K. Choong**	167	Selection of the control parameter in displacement incrementation
O. G. McGee	175	Influence of warping–pretwist coupling on the torsional vibration of centrifugally-stressed cantilevers with thin-walled open-profiles
O. G. McGee and **K. F. Phan**	197	Adaptable optimality criterion techniques for large-scale space frames with multiple frequency constraints
O. G. McGee	211	Performance of continuum and discrete three-dimensional vibration analyses of twisted cantilevered parallelepipeds
Yee Hsiung Kuo, Tzung Hurng Wu and **Sen Yung Lee**	229	Bending vibrations of a rotating non-uniform beam with tip mass and an elastically restrained root
M. M. ElMadany	237	Integral and state variable feedback controllers for improved performance in automotive vehicles
M. M. ElMadany and **Z. Abduljabbar**	245	On the ride and attitude control of road vehicles
B. F. Song	255	A numerical integration method in affine space and a method with high accuracy for computing structural system reliability
Y. Xia and **C. Ruiz**	263	Unidirectional ceramic matrix composites under dynamic flexure
T. Belytschko	271	On computational methods for crashworthiness
T. C. Mathew, G. Singh and **G. V. Rao**	281	Thermal buckling of cross-ply composite laminates
	I	Software Survey Section

NUMBER 3

M. P. Saka and **M. Ulker**	289	Optimum design of geometrically nonlinear space trusses
J. R. Banerjee and **F. W. Williams**	301	Coupled bending–torsional dynamic stiffness matrix for Timoshenko beam elements
Y. Rong and **H. S. Tzou**	311	Dynamic characteristics evaluation of elastically jointed structures through stochastic simulation

A. Y. T. Leung	321	Dynamic stiffness for lateral buckling
J. G. Teng and **J. M. Rotter**	327	Geometrically and materially nonlinear analysis of reinforced concrete shells of revolution
A. Gakwaya, D. Lambert and **A. Cardou**	341	A boundary element and mathematical programming approach for frictional contact problems
Y. W. Liu and **F. Moses**	355	Truss optimization including reserve and residual reliability constraints
S. Mahadevan	365	Probabilistic optimum design of framed structures
J. Nagabhushanam, C. J. Srinivas and **G. H. Gaonkar**	375	Symbolic generation of elemental matrices for finite element analysis
Mallikarjuna and **T. Kant**	381	A general fibre-reinforced composite shell element based on a refined shear deformation theory
Zhou Ding	389	Vibration of an arbitrarily shaped membrane carrying elastically mounted masses
P. Krishna Iyer and **C. Sam**	395	Three-dimensional analysis of pile caps
H. Adeli and **O. Kamal**	413	Concurrent analysis of large structures—I. Algorithms
H. Adeli and **O. Kamal**	425	Concurrent analysis of large structures—II. Applications
Y. Lavy, P. Bar-Yoseph and **G. Rosenhouse**	433	Mixed-hybrid finite strip method for folded plate structures
		Technical Note
B. K. Chakrabarty	447	Models for optimal design of reinforced concrete beams
	I	Software Survey Section

NUMBER 4

W. T. Segui and **G. L. Farrow**	453	An expert system for the design of post-tensioned flat plates
K. H. Low	461	On some numerical algorithms for the solution of mechanical vibrations
G. Singh, G. Venkateswara Rao and **N. G. R. Iyengar**	471	Nonlinear bending of thin and thick unsymmetrically laminated composite beams using refined finite element model
B. Tripathy and **K. P. Rao**	481	Stiffened composite cylindrical panels—optimum lay-up for buckling by ranking

R. C. Batra and **A. Adam**	489	Steady-state penetration of transversely isotropic rigid/perfectly plastic targets
C. S. Tsai	497	Semi-analytical solution for hydrodynamic pressures on dams with arbitrary upstream face considering water compressibility
J. L. Chen and **J. S. Ho**	503	Direct variational method for sizing design sensitivity analysis of beam and frame structures
P. A. F. Martins and **M. J. M. Barata Marques**	511	MODEL3—a three-dimensional mesh generator
A. S. Gendy, A. F. Saleeb and **T. Y. P. Chang**	531	Generalized thin-walled beam models for flexural–torsional analysis
E. Mahajerin	551	An extension of the Runge–Kutta method for *n*th order initial value problems
A. M. Al-Fahed and **P. D. Panagiotopoulos**	555	Multifingered frictional robot grippers: a new type of numerical implementation
Y. Z. Chen	563	Evaluation of stress singularity coefficient from the solution of the notch problem
M. Zeghal and **A. M. Abdel-Ghaffar**	569	Local–global finite element analysis of the seismic response of earth dams
C. H. Kang and **G. de Saxcé**	581	Computation of stress intensity factors for plate bending problem in fracture mechanics by hybrid mongrel finite element
Guo Yanlin	591	Ultimate load behaviour of welded thin-walled stub columns under combined loading of axial compression and bending
K. Biswas	599	Investigations of the state of stress and *J*-integral analysis of an implant weldability test specimen
V. Rimboym and **K. Kim**	613	Analysis of the new double acting pilot control system—I. Background and mathematical model
V. Rimboym and **K. Kim**	621	Analysis of the new double acting pilot control system—II. Control system and experimental verification
R. Ben-Zvi, A. Libai and **M. Perl**	631	A curved axisymmetric shell element for nonlinear dynamic elastoplastic problems—I. Formulation
R. Ben-Zvi, M. Perl and **A. Libai**	641	A curved axisymmetric shell element for nonlinear dynamic elastoplastic problems—II. Implementation and results
		Compendium
X. Wu, J. Ghaboussi and **J. H. Garrett, Jr**	649	Use of neural networks in detection of structural damage

Technical Notes

M. Eisenberger and **J. Bielak** 661 Finite beams on infinite two-parameter elastic foundations

J. M. Tembulkar and **B. W. Hanks** 665 On generating quadrilateral elements from a triangular mesh

669 Corrigenda

I Software Survey Section

NUMBER 5

Z. Friedman and **J. B. Kosmatka** 671 Exact stiffness matrix of a nonuniform beam—I. Extension, torsion, and bending of a Bernoulli–Euler beam

Y. K. Cheung and **Chen Wanji** 683 Refined hybrid method for plane isoparametric element using an orthogonal approach

K. Y. Sze, Chen Wanji and **Y. K. Cheung** 695 An efficient quadrilateral plane element with drilling degrees of freedom using orthogonal stress modes

S. H. Nguyen 707 An accurate finite element formulation for linear elastic torsion calculations

S. K. Sharan 713 Efficient finite element analysis of hydrodynamic pressure on dams

S. L. Padula, C. A. Sandridge, J. L. Walsh and **R. T. Haftka** 725 Integrated controls–structures optimization of a large space structure

K. N. Chiang and **R. E. Fulton** 733 Parallel transient finite element analysis

R. C. Kar and **T. Sujata** 741 Dynamic stability of a rotating, pretwisted and preconed cantilever beam including Coriolis effects

M. H. Omurtag and **A. Y. Aköz** 751 Mixed finite element formulation of eccentrically stiffened cylindrical shells

G. Gounaris and **V. J. Papazoglou** 769 Three-dimensional effects on the natural vibrations of cracked Timoshenko beams in water

Y. A. Khulief and **A. Bazoune** 781 Frequencies of rotating tapered Timoshenko beams with different boundary conditions

Seung Hwan Ko and **Byung Man Kwak** 797 Frictional dynamic contact analysis using finite element nodal displacement description

G. S. Ray and **B. K. Sinha** 809 Profile optimization of variable thickness rotating disc

M. S. A. Abbasi, M. H. Baluch, A. K. Azad and H. H. Abdel Rahman 815 Nonlinear finite element modelling of failure modes in RC slabs

A. Altaee, E. Evgin and B. H. Fellenius 825 Finite element validation of a bounding surface plasticity model

J. Napoleão, Fo., A. E. Elwi and D. W. Murray 833 An eigenvector-based strategy for the analysis of inelastic structures

Technical Notes

N. Bencharif and S. F. Ng 849 Method of change of variable decomposition to solve and invert a system of linear equations

F. Venancio Filho and A. M. Claret 853 Matrix formulation of the dynamic analysis of SDOF systems in the frequency domain

I Software Survey Section

NUMBER 6

A. Ranjbaran 857 A computer program for perspective projection of three-dimensional finite element models

L. F. Zeng and N.-E. Wiberg 869 Adaptive *h–p* procedures for high accuracy finite element analysis of two-dimensional linear elastic problems

A. Billinghurst, J. R. L. Williams, G. Chen and N. S. Trahair 887 Inelastic uniform torsion of steel members

S. C. Lin and T. Y. Kam 895 Buckling analysis of imperfect frames using a stochastic finite element method

W. Shan 903 Computer analysis of foldable structures

D. W. Meyer, M. E. Plesha and R. F. Cooper 913 A contact friction algorithm including nonlinear visco-elasticity and a singular yield surface provision

A. Eriksson 927 On a thin shell element for non-linear analysis, based on the isoparametric concept

G. Onu 941 Analogies with shear effect in the structural analysis

M. Özakça, E. Hinton and N. V. R. Rao 953 Comparison of three-dimensional solid elements in the analysis of plates

J. Ryu, Sung-Soo Kim and Sang-Sup Kim 969 An efficient computational method for dynamic stress analysis of flexible multibody systems

Compendium

M. P. Rossow and R. L. Mosher 979 Design of cellular cofferdams by the CCELL computer program

Technical Note

H. Matsuda, C. Morita and T. Sakiyama 989 An approximate method of shallow shells with variable thickness

I Software Survey Section
